ABOUT ME

A Computer Science student specializing in Data Science with an interest in AI/ML, LLM training, and software development. Currently working with LLMs and supervised machine learning models, while developing practical software solutions. Interested in applying AI to healthcare and building useful applications.

EDUCATION

NIST UNIVERSITY **B-Tech in Computer Science Engineering(Data Science)**

2024-2028 CGPA: 8.75/10

INTERNSHIP

Oct 2026-dec 2026
Unified Mentor Pvt. Ltd

Data Science

Data Science Intern at Unified Mentor Pvt. Ltd., gaining practical experience in data analysis, data preprocessing, and machine learning.Learning to apply Python and data science techniques to real-world problems through hands-on projects.

Jun 2026-jul 2026
India Space technology

Space Technology

Completed a Summer Internship & Technical Training Program at India Space Lab (June–July 2026), gaining hands-on exposure to drone technology, CanSat/CubeSat systems, remote sensing (GIS), rocketry, and disaster management.

PROJECTS

1.Rare Disease Prediction Ai

Developed a Rare Disease Prediction AI using Python, PyTorch, and HPO-based phenotype analysis to rank candidate diseases, integrate genetic evidence, and evaluate prediction performance using Top-K accuracy, MRR, and statistical comparisons.

2.Patient Case Taking Software

Developed MediKiosk, a multilingual AI-powered patient case-taking platform using React, FastAPI, and PostgreSQL, integrating voice-based symptom collection, medical document OCR, red-flag detection, and a Doctor Dashboard for patient history and priority-case management.

3.SecureWipe Enterprise v2.0 | Data Sanitization Platform

Developing a secure data-wiping platform using Electron, Go, and Rust for storage device detection, sanitization, verification, and tamper-evident audit logging, aligned with NIST SP 800-88 guidelines.

CERTIFICATIONS&ACHIEVEMENTS

- Artificial Intelligence & Machine Learning — Internshala Trainings
- Data Science Essentials with Python — Cisco Networking Academy
- Prompt Wars: Bengaluru (AI Hackathon) — Google for Developers
- Object Oriented Programming with C++ — NIST University
- Data Analytics using Python with Power BI and Tableau — NIST University

TECHNICAL SKILLS

- Languages: Python, Java, C, JavaScript, SQL
- AI & Machine Learning: Supervised Learning, Classification, Regression, CNNs, NLP, Feature Engineering, Model Evaluation
- Libraries & Frameworks: NumPy, Pandas, Scikit-learn, PyTorch, TensorFlow, OpenCV
- Generative AI: LLM APIs, Prompt Engineering, Gemini API
- Web Development: HTML, CSS, Node.js, REST APIs
- Developer Tools: Git, GitHub, Jupyter Notebook, Google Colab, VS Code, Vercel
